

Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A media cartridge, comprising:

a case in which a roll of blank media may be deployed;

the case having two halves, hinged together, an area between the two halves, when closed, defining a media supply slot;

the case having internally and adjacent to the slot, a pair of rollers, at least one of the rollers being a driven roller which is supported at each end, by the case, for rotation by an external motor;

the cartridge further comprising at least one ~~elip~~support molding adapted to engage a ~~support shaft~~ for said roll of media and said pair of rollers to retain said ~~support shaft~~ and said pair of rollers in an operative association with respect to each other.

2. (Original) A media cartridge as claimed in claim 1, wherein:

the two rollers are held in proximity by a resilient bias, one roller on either side of the slot.

3. (Original) A media cartridge as claimed in claim 1, wherein:

the driven roller has at one end, a fixture for coupling to a driving shaft, the case having an opening which allows access to the fixture.

4. (Currently amended) A media cartridge as claimed in claim 2, wherein:

the rollers are held in proximity by a pair of said ~~elips~~support moldings;

each roller having a circumferential slot at each end;

each ~~elip~~support molding having two extensions which engage the slots of both rollers at one end.

5. (Currently amended) A media cartridge as claimed in claim 4, wherein:

the two extensions of a ~~elip~~support molding are joined to a ~~elip~~support molding body, the body having a central opening for receiving and locating a core which fits in the case.

6. (Currently amended) A media cartridge as claimed in claim 5, wherein:

the ~~elip~~support molding body has an anti-rotation feature which is adapted to engage with a cooperating feature of a core, to prevent the core from rotating in the case.

7. (Currently amended) A media cartridge as claimed in claim 6, further comprising:

a core, adapted to cooperate with the ~~elip~~support molding body by engaging with the anti-rotation feature.

8. (Currently amended) A media cartridge as claimed in claim 7, wherein:

the case has at one or both ends, slots for receiving and retaining a ~~elip~~support molding body.

9. (Original) A media cartridge as claimed in claim 1, further comprising:
an integral handle at one end of the case.
10. (Original) A media cartridge as claimed in claim 1, further comprising:
a folding handle located on a top surface of the case.
11. (Original) A media cartridge as claimed in claim 1, further comprising:
an integral handle at one end of the case and a folding handle located on a top surface of the case.
12. (Original) A media cartridge as claimed in claim 1, wherein:
the case is a molded polymeric case with an integral hinge, held in a closed position by one or more clips.
13. (Original) A media cartridge as claimed in claim 1, wherein:
the driven roller is longer than the other roller, the other roller being an idler roller which is contained within the case when it is closed.
14. (Currently amended) A media cartridge as claimed in claim 4, wherein:
the elips-support moldings are reversible and adapted to be used at either end of the case.
15. (Currently amended) A media cartridge as claimed in claim 1, wherein:
the two case halves are formed as a single molding with an integral hinge, the molding having formed in it internal slots for receiving a pair of elips-support moldings ~~which are used to hold the rollers in proximity.~~
16. (Original) A media cartridge as claimed in claim 1, wherein:
one case half has formed in it a journal at each end for supporting one of the rollers.
17. (Original) A media cartridge as claimed in claim 1, wherein:
one case half has formed in it a journal at each end for supporting the driven roller.
18. (Original) A media cartridge as claimed in claim 1, further comprising:
a core which is located in the case, the core having around it, a supply of blank wallpaper media.
19. – 47. (Cancelled)
